“

*We believe the health care services provided to our consumers should reflect professionalism, respect, and compassion.*

Accu Care was started in August of 1985 by JoAnn R Curry and Mary Patricia Hopper, both registered professional nurses with over twenty-five (25) years of nursing experience. Having worked in various aspects of the Nursing field throughout our careers, we realize the importance of providing quality nursing care to individuals in a home care setting.

Healthcare has always been an ever changing and very progressive field in our society. The increasing technological advances in medicine and health care enable individuals to stay in a home care setting. No longer is it necessary for an individual to remain in the hospital or placed in a long-term care facility for effective healthcare. It is now possible for these people to receive health care services in the comfort of their own homes, safely and adequately.

Being able to view the client as a total human being in the health/illness continuum is a very important aspect of home care. To accomplish this effectively, the Consumer Directed Personal Assistance Program (CDPAP) requires that consumers are completely responsible to make their own decisions regarding who they'd like to hire, as well as training, disciplining, and scheduling their employee.

## ACCU CARE'S PHILOSOPHY

The philosophy of this home health care agency is to have services provided to every client reflect the uppermost aspect of professionalism. This includes:

- > **CONFIDENTIALITY**
- > **RESPECT**
- > **COMPASSION**
